

Positive Planetary Energies

By Valentino Salvato

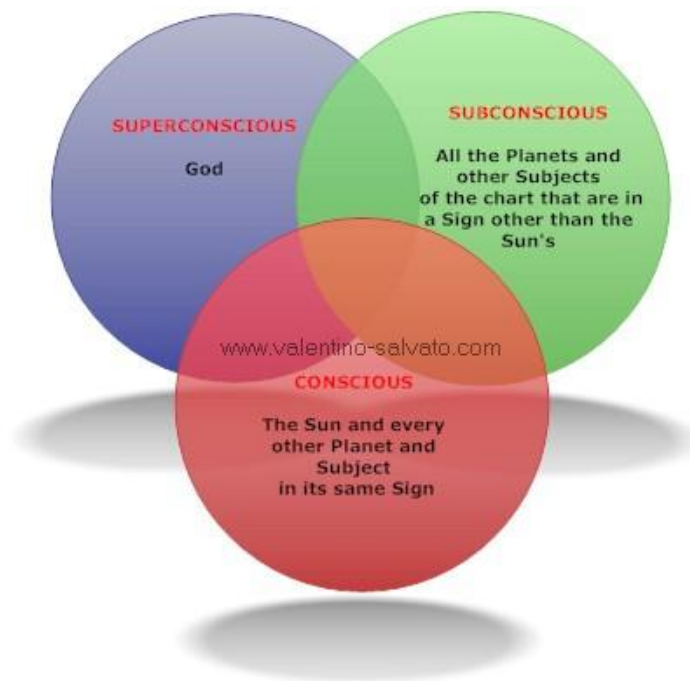

© Valentino Salvato 2008

This is a list of the main positive planetary energies. WE ALL HAVE THEM WITHIN but it is our *choice* and *responsibility* to tap into these *resourceful states* and reap the corresponding *benefits*. It's all a matter of *knowledge, attitude* and *behaviour*.

They are differently combined at birth for each individual and that's what makes every human being *unique*. They are positioned differently in our *Natal Charts* and their energies are *triggered* every time a *Planet* moves and *transits* over each one of them (and in the *Signs* they are hosted).

Within approx one month the *Moon* transits over all of them and, within one year, the *Sun* does the same. This alone will give you the opportunity to *feel* all the positives you have within and to become *aware* of all of them within a relatively short period of time.

Astrology accounts for the whole person at all levels: *conscious, subconscious* and *superconscious*.

The Planets do not force you to say and do anything. They just give you the opportunity to respond appropriately to whatever happens to you in every moment of your life. The choice and responsibility is always yours and the Planets will only bring you the results you deserve, at the right moment, through the well known Universal Laws:

1. ***Law of Oneness:*** everything is connected to everything else.
2. ***Law of Polarity:*** everything is dual and has its pair of opposites.
3. ***Law of Gender:*** everything has its masculine and feminine principles.
4. ***Law of Correspondence:*** as below so above, and as above so below.
5. ***Law of Causation:*** every cause has its effect, and every effect has its cause (the *law of sowing and reaping* + the *law of germination*, i.e. it takes time, energy and care before you can reap).
6. ***Law of Cycles:*** lessons are repeated until they are learned.
7. ***Law of Vibration:*** everything vibrates (thoughts are vibrations too).
8. ***Law of Attraction:*** like resonates with like (as within so without).
9. ***Law of Perpetual Transmutation of Energy:*** everyone can change the conditions of his/her life.
10. ***Law of Order:*** everything is exactly as it should be.

Therefore, don't waste your time trying to predict the future but help yourself to create it !!!

It is possible (and desirable) to plan your life and you can perfectly do so with the help of a great Astrologer and Life & Business Coach.
